

# FIVE SHADES OF GREY

It's not always clear to students what is acceptable and what is not when it comes to academic integrity.

These are the **grey areas** where students sometimes make mistakes.

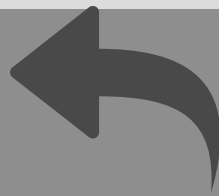

## Grey Area #1

You give your assignment to a friend who tells you that they just want an example to see what the professor expects.

However, your friend gets desperate and copies your work. This leads to an academic integrity breach for both you and your friend.

## Instead, to help your friend:

- Ensure that they understand the assignment requirements
- Ask them to think about what interests them about the topic
- Encourage them to seek help from their professor, the Tutoring Centre, or the Library

## Questions?
