

IMPORTANT MESSAGE FROM SONAMI REGARDING COVID-19:

Special Projects

We are encouraged by the volume of support and outreach that we have received to help address the COVID-19 outbreak.

Thanks to the support of FedDev Ontario – SONAMI and its Partner Institutions have access to heightened levels of funding, up to 100 per cent, in order to support companies as they rapidly respond to the COVID-19 pandemic by building a Canadian supply of essential equipment, products, and therapeutics. The funding is intended to help manufacturers to provide a high-quality, rapid response to the COVID-19 pandemic.

Project Parameters: These projects must have a short turnaround time (ideally under 4 months), be based in Southern Ontario, and directly support the prevention and spread of COVID-19. If you have a project idea that will support this effort, please contact the SONAMI team to assess the project and connect you to our partners.
