Assessment Samples

This booklet contains samples of the types of questions you could expect to find in your Assessment. The sample questions reflect the format of the assessment items, but not the degree of difficulty of all the questions in the Assessment.

Helpful hints

1. Get a good night's sleep before the test and arrive early for the assessment session.
2. Don't let the thought of writing an assessment make you too nervous, although a little nervousness is natural and even helpful.
3. When the Assessment Centre Specialist is explaining the process, listen carefully and follow all the directions.
4. Ask questions if anything is unclear. The Assessment Centre Specialist is there for that purpose.
5. The assessment is multiple-choice, except for the essay portion and the high tech math. You will be required to choose the best answer to a question from several choices. You may mark an answer even if you are not perfectly sure it is right.
6. If one question is too hard, leave it and go on to the next. You can always come back and try it again if there is time.
7. If you come to a section in the assessment that you cannot do, don't give up. There may be parts of the assessment further on which are easier for you. Keep working.
8. Work steadily and complete as many questions as you can.
9. To help you succeed, we highly recommend that you review material related to areas covered in the Mature Student Assessment (e.g. Reading Comprehension, English grammar skills and Math skills.) Inquire at your Public Library or a local bookstore about texts that provide a review of these areas.

ACCUPLACER - Reading Comprehension, Sentence Skills and Writing Skills

For complete information on and for **sample practice questions** please visit the Accuplacer website <https://www.accuplacer.org>

ACCUPLACER - Reading Comprehension 30 minutes

The Reading Comprehension test, comprised of 20 questions, measures your ability to understand what you read, to identify main ideas and to make inferences. You need to distinguish between direct statements and secondary or supporting ideas.

In an ACCUPLACER placement test, there are 20 questions of two primary types in Reading Comprehension.

- The first type of question consists of a reading passage followed by a question based on the text. Both short and long passages are provided. The reading passages can also be classified according to the kind of information processing required, including explicit statements related to the main idea, explicit statements related to a secondary idea, application, and inference.
- The second type of question, sentence relationships, presents two sentences followed by a question about the relationship between these two sentences. The question may ask, for example, if the statement in the second sentence supports that in the first, if it contradicts it, or if it repeats the same information.

Read the statement or passage and then choose the best answer to the question. Answer the question based on what is stated or implied in the statement or passage.

1. In the words of Thomas DeQuincey, “It is notorious that the memory strengthens as you lay burdens upon it.” If, like most people, you have trouble recalling the names of those you have just met, try this: The next time you are introduced, plan to remember the names. Say to yourself, “I’ll listen carefully; I’ll repeat each person’s name to be sure I’ve got it, and I will remember.” You’ll discover how effective this technique is and probably recall those names for the rest of your life.

The main idea of the paragraph maintains that the memory

- A. always operates at peak efficiency.
- B. breaks down under great strain.
- C. improves if it is used often.
- D. becomes unreliable if it tires.

For the questions that follow, two underlined sentences are followed by a question or statement. Read the sentences, then choose the best answer to the question or the best completion of the statement.

2. The Midwest is experiencing its worst drought in 15 years.
Corn and soybean prices are expected to be very high this year.

What does the second sentence do?

- A. It restates the idea found in the first.
- B. It states an effect.
- C. It gives an example.
- D. It analyzes the statement made in the first.

Correct answers: 1(C), 2 (B)

ACCUPLACER - Sentence Skills 30 minutes

The Sentence Skills test, comprised of 20 questions, measures your understanding of sentence structure — what makes a sentence complete and clear. Some questions deal with the logic of the sentence, and others with the relationships between two sentences

In an ACCUPLACER® placement test, there are 20 Sentence Skills questions of two types.

The first type is sentence correction questions that require an understanding of sentence structure. These questions ask you to choose the most appropriate word or phrase for the underlined portion of the sentence.

The second type is construction shift questions. These questions ask that a sentence be rewritten according to the criteria shown while maintaining essentially the same meaning as the original sentence.

Within these two primary categories, the questions are also classified according to the skills being tested. Some questions deal with the logic of the sentence, others with whether or not the answer is a complete sentence, and still others with the relationship between coordination and subordination

Select the best version of the underlined part of the sentence. The first choice is the same as the original sentence. If you think the original sentence is best, choose the first answer.

1. Stamp collecting being a hobby that is sometimes used in the schools to teach economics and social studies.
 - A. being a hobby that is
 - B. is a hobby because it is
 - C. which is a hobby
 - D. is a hobby

Rewrite the sentence in your head following the directions given below. Keep in mind that your new sentence should be well written and should have essentially the same meaning as the original sentence.

2. It is easy to carry solid objects without spilling them, but the same cannot be said of liquids.

Rewrite, beginning with
Unlike liquids,

The next words will be

- A. it is easy to
- B. we can easily
- C. solid objects can easily be
- D. solid objects are easy to be

Correct answers: 1 (D), 2 (C)

ACCUPLACER - Writing skills: Essay 65 minutes

This test measures your ability to write effectively, which is critical to academic success.

Your writing sample will be scored on the basis of how effectively it communicates a whole message to the readers for the stated purpose. Your score will be based on your ability to express, organize and support your opinions and ideas, not the position you take on the essay topic. The following five characteristics of writing will be considered:

- Focus — the clarity with which you maintain your main idea or point of view
- Organization—the clarity with which you structure your response and present a logical sequence of ideas
- Development and Support—the extent to which you elaborate on your ideas and the extent to which you present supporting details
- Sentence Structure — the effectiveness of your sentence structure
- Mechanical Conventions —the extent to which your writing is free of errors in usage and mechanics

Sample Topic

Prepare a multiple-paragraph writing sample of about 300–600 words on the topic below. You should use the time available to plan, write, review and edit what you have written. Read the assignment carefully before you begin to write.

Some schools require each student to participate in an organized school sport chosen by the student. People at these schools argue that athletics is an important part of the educational experience and that there should be a rule requiring participation. Others argue that students should be free to decide whether or not they wish to

participate in organized school sports. Write an essay for a classroom instructor in which you take a position on whether participation in organized school athletics should be required. Be sure to defend your position with logical arguments and appropriate examples. Your essay must be 300–600 words in length.
